

DIPENDRA PANDEY

Flutter Full-Stack Developer

Lainchaur, Kathmandu | +977 9867318378 | pandey.dipendra.np@gmail.com | github.com/Dipu-111

CAREER SUMMARY

Flutter full-stack developer with 2+ years of Flutter experience and about a year of professional experience building enterprise mobile applications end-to-end — Flutter front-end, Flask REST APIs, and Oracle/MySQL data layers. Currently part of a development team building and maintaining mobile modules across a multi-module enterprise ERP platform (SFA, CRM, HRM/ESS, and core ERP). Comfortable with Riverpod, GetX, and Provider for state management, and experienced with offline-first architecture, REST API integration, and clean, type-safe data modeling with Freezed.

WORK EXPERIENCE

Flutter Developer — [POWER BRAINS]

[2026 JAN] – Present

- Part of the development team building and maintaining the Flutter mobile client across a multi-module enterprise ERP platform, working with Riverpod, Freezed, Flask REST APIs, and Oracle.
- SFA (Sales Force Automation): field sales tracking — customer visit logging, beat/route planning, and sales-vs-collection reporting.
- CRM: multi-stage lead pipeline management, lead history timelines, quotation generation, and win/loss reporting dashboards.
- HRM / ESS: employee self-service features including profile management, leave requests, company events, holiday calendars, and policy documents.
- ERP: core company setup, shared master data, and document management underpinning the other modules.
- Collaborated with backend and QA team members using Git-based workflows (GitHub/GitLab) for version control and code review.

Flutter Developer — Personal Project — Independent

Self-directed

- Built a complete offline-first eCommerce mobile application using Flutter, MVC architecture, and REST API integration.
- Implemented user authentication, product listing, cart functionality, and state management using GetX and GetStorage.

PERSONAL PROJECTS

• Digital Khata — Expense Tracker:

Offline-first personal/shop expense tracker with background sync, Excel export, and backup & restore. Built with Flutter, Riverpod, Flask, Oracle, and Google API integration.

• HouseHunt — Property Search App:

In-progress property listing and search app with location and criteria-based filtering. Built with Flutter, Riverpod, Django REST Framework, and SQLite.

• To-do List App:

Lightweight task manager built to practice clean state management and UI patterns, using Flutter and Riverpod.

• Practice Projects:

Analog clock, stopwatch & timer with lap tracking, world clock, and Google Maps integration experiments — available on GitHub.

SKILLS

Mobile: Flutter, Dart, Riverpod, GetX, Provider, Freezed, flutter_screenutil, custom widgets

Backend: Flask (REST APIs), Basic Django REST Framework, MVC architecture, API integration

Database: Oracle, MySQL, SQLite, GetStorage, Hive Storage

Other Languages: C, C++, JavaScript, PHP, XML, basic .NET

Web: HTML, CSS, Bootstrap

Tools: VS Code, GitHub, GitLab, GitHub Actions, Postman, Figma, Draw.io

Concepts: DSA, OOP, offline-first design, async/await, null safety, REST API integration

Professional Development: Completed 14-day Codelt Workshop — hands-on Flutter & Dart coding experience

EDUCATION

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)

Amrit Campus, Tribhuvan University | 2022 – 2026 (8th Semester, Final Year)

+2 Science

NEB | 2020 – 2022
